# SAFIR-Ready

Ad-hoc BVLOS drone operations

Our collaborative network comprises a diverse array of partners, each possessing specialised expertise and representing a broad spectrum of EU stakeholders, ensuring our solution has t a well-rounded perspective on all critical domains.

Our advisory board encompass a wide array of sectors, including aviation standards and regulation, connectivity solutions, air traffic management, local authorities, healthcare, and critical infrastructure, offering informed insights into the intricacies of the industry

# SAY HELLO TO THE TEAM !

# ABOUT THE PROJECT

SAFIR-Ready is dedicated to revolutionising urban airspace management by pioneering comprehensive U-space services, systems, and procedures that prioritise safety and efficiency. By automating airspace management and enhancing digital communication, the initiative strives to enable swift air mobility for vital services like medical emergencies and critical infrastructure, ensuring the safety of lives and property.

SAFIR-Ready partners will showcase a diverse array of U3 and intelligent mobility operations and services. These demonstrations will encompass flights within uncontrolled Very Low Level Airspace, both within Visual Line of Sight and Beyond, along with engagements involving both manned and unmanned aircraft. The primary focus will be on practical applications, particularly in the realms of emergency medical services and critical infrastructure support. Stay tuned for exciting updates and insights as the project unfolds!
